

We Now Offer VIZZ

The FDA approved once daily prescription eye drop that restores near vision for up to 10 hours.

See results with VIZZ

Real experiences, clear results

91%

of patients improved their near vision within 30 minutes.

Up to 10 hours

of clear near vision with a once daily dose.

The most common side effects that may be experienced while using VIZZ include eye irritation, temporary dim or dark vision, headaches, and eye redness.

“The drops actually brought back some confidence in me, my appearance. I felt better about myself.”

Chad, 48, VIZZ user

IMPORTANT SAFETY INFORMATION

VIZZ (acedilide ophthalmic solution) 1.44% is a prescription eye drop used to treat age-related blurry near vision (presbyopia) in adults.

Do not use VIZZ if you are allergic to any of the ingredients.

The most common side effects that may be experienced while using VIZZ include eye irritation, temporary dim or dark vision, headaches, and eye redness.

Be careful not to allow the vial to touch your eye or any surfaces to help avoid potential eye injury or contamination of the product. Discard the opened vial immediately after use.

If you wear contact lenses, remove them prior to using VIZZ. After dosing, contact lenses can be reinserted after 10 minutes.

If you use more than one topical eye medication, administer the medicines at least 5 minutes apart.

You may experience temporary dim or dark vision after using VIZZ. Do not drive or operate machinery if vision is not clear.

Seek immediate medical care if you experience sudden onset or flashing lights, floaters, or vision loss.

To report SUSPECTED ADVERSE REACTIONS, contact LENZ Therapeutics, Inc, at 1-888-711-LENZ or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

For additional safety information, see full Prescribing Information and discuss with your eye doctor.
